Orchids

MONROE, MICHIGAN

HYBRID SEEDLINGS

		Size	Price Each
D-10	C Marion Davies X C trianae Broomhills var. A pure white will be the result of the cross of these two wonderful parents, to bloom in late winter and early spring.	4"	\$15.00
D-11	Lc Bou Phillipo A glorified mossiae for the Easter season. Larger and darker blooms.	4"	10.00
D-12	C Clementine Goldfarb X C Pegeen Fitzgerald. Pure white blooms for November and December are the result of this fine cross.	4"	15.00
E-10	Lc Queen Mary X C Harry Gray This should be a large, dark early winter bloomer. Bred to get a good sized Harry Gray which is a dark fall bloomer. Queen Mary was dark and very large. Expect a deep rose bloom.	2-1/2"	3.00
E-12	C Gravesiana X C Edithae This pure white should flower in mid-winter, a period when good whites are somewhat scarce.	1-3/4" 2-1/2"	2.00 3.00
E-13	C Harry Gray X Lc Barbarossa This is a cross for size and substance. Both parents were dark with C Harry Gray displaying a certain bronze influence from its dowiana background. Lc Barbarossa was exceptionally good sized.	2-1/2"	3.00

E-14	C Richmond alba X C Prince John. A very fine Prince John was used for this cross. It was a sulphur yellow, having leathery texture. There will be a range of color from lemon white, yellow to pink from this cross.	2-1/2"	3.00
		3"	5.50
E-15	Lc Manda Bronze X Lc Prince John. A fine bronze from the Wm. Manda collection was crossed with a very fine sulphur yellow. Lc Prince John was the other parent. A fine yellow will be the result.	2-1/2"	3.00
		3"	5.50
F-1	C Gigas var Sanderiana X Lc South Esk var the Governor. The Lc South Esk used in this cross is one of the finest ever seen. Very large and dark, full shaped and extra heavy. Spring.	2"	1.50
F-2	C Hardyana var Ruby X Bc Corrientes. A cross between two very fine flowers. Should be large and dark and very heavy texture. Late spring.	2"	1.50
F-3	C Enid X Lc Joan Madison. The Lc Joan Madison used here was a large, very dark flower and bloomed several times a year. A good Enid is an asset in any cross. Various.	2"	1.50

F-4	C Trimos X Blc Malvern The C Trimos used was a very light orchid color quite large and well shaped. The Blc Malvern was one of the finest yellow orchids I have ever seen. Very large, extra heavy texture, and deep golden yellow. I expect some fine yellow and bronzes from this cross. Winter and spring.	2"	2.00
F-6	C Mossiae X Lc Ludgate A good mossiae crossed with a very fine Lc Ludgate should produce an Easter blooming flower of fine quality. Spring.	2"	1.50
F-7	Bc Gordon W. Dillon (C Gigas var Sanderiana X Bc Imperialis) This cross should produce a fine Brasso. Both plants were fine flowers. Winter and Spring.	2"	1.50
F-18	C Nell Montgomery A pure white to bloom in late winter and early spring.	4"	15.00
G-10	Lc Titymoma var supreme	2-1/2"	3.00
	X C Belgica var Robt. Doig. Both parents were large and very dark outstanding blooms. Late Winter.	3"	5.50
G-11	C Amabilis Slotter's variety X C Crepuscule var. Crimson Glory. A very large dark bloom is expected from this cross.	2"	1.50
G-13	C Edithae var. La Madelon X Bc Seafoam var. Snowsheen. Pure white flowers of excellent quality to bloom in the spring is expected from this cross.	2"	2.00

|------|---|----|------|
| G-15 | Lc Avignon var. Flora X C
Amabilis Slotter's var.
Another very dark cross of
excellent quality. | 2" | 1.50 |
| J-10 | Lc Warnhamensis X Lc Siren.
A dark purple of good size and
quality should be the result of
this cross. | 2" | 1.50 |
| J-12 | (Lc Pacavia X Lc Aphrodite) X
Duprecana.
A purple bloom of good quality
is to be expected here. | 2" | 1.50 |
| K-10 | C Remey Chollet var. Bruge X
Lc Invicta FCC.
A dark purple bloom for the
Easter season will be the re-
sult of this cross of fine parents. | 2" | 1.50 |
| K-11 | Lc Hyperion FCC X Lc Geo Ciejska
Another dark purple of excellent
quality for the Easter season. | 2" | 1.50 |
| K-12 | C Lady Vei tch X C Barbara Dane
var. Perfection.
Large, pure white of heavy sub-
stance. One of these seedlings
flowering for the first time took
a gold medal. November on. | 2" | 2.00 |
| K-16 | Lc Miranda X Lc Vollandia.
A good bronze is to be ex-
pected here. Early winter
will be the blooming time. | 2" | 2.00 |
| | A fine white with purple lip to
bloom in May and June. | | |
| K-19 | Lc Model var. Moreda FCC X C
Remey Chollet var. Bruge.
A very dark purple bloom of ex-
cellent quality during the winter
time. | 2" | 1.75 |

- | | | | |
|------|---|--------------------|-----------------------|
| K-20 | Lc Princess Margaret var.
Boneycrest X Lc Bernice.
The offspring of this cross
will vary in color from bronze
to dark purple but all should be
fine. Late Fall. | 2" | 1.75 |
| K-21 | Lc Princess Margaret var.
Boneycrest X Lc Cameronian.
Lc Princess Margaret has
proved an excellent parent so
it is being used again and again.
This cross will produce dark
purple blooms. Late Fall. | 2" | 1.75 |
| K-22 | Lc Miranda X Lc Canthab.
A bronze of good quality
should be the result of
this cross of excellent
parents. Early winter. | 2" | 2.00 |
| K-24 | C Ardmore X Lc Model
var. Moreda FCC.
A very good dark purple
of excellent quality is ex-
pected from this cross.
February on. | 2 " | 1.75 |
| K-24 | Lc Cynthia var. Majestica
FCC X C Dionysius alba.
Gold medal winner. A
very good white with
purple lip is expected from
this cross. | 2" | 1.75 |
| P-13 | C mossiae "Reineckiana"
(Young's var.) X C Gigas
FMB.
This cross blooms in Jan-
uary, February and March.
Flowers are large and well
shaped, paper white in the
sepals and petals; lips dark,
large and very interesting. | 2 1/2"
3"
4" | 5.00
6.00
12.50 |

- R-18 Lc Sam Houston X Lc Pamela
 X C Gatton Ruby. 2 1/2" 3.00
 The seed parent was an 8" 3" 5.50
 December bloom with deep
 rose sepals and petals; in-
 tense, deeply ruffled crim-
 son lip and bright gold zone
 in the throat. An 8" November
 bloom from the dark and breath-
 takingly beautiful un-named
 Pamela X Gatton Ruby hybrid
 provided the pollen. This cross
 should produce outstandingly
 large, dark winter blooms.
- R-19 C Fabia X Lc Elissa X Lc
 Valencia. 2" 2.50
 C Fabia seed parent was a 2 1/2" 4.00
 medium mauve 6 1/2" bloom
 with a lovely frilled crimson
 lip, veined with golden yellow
 Vigorous grower and profuse
 bloomer, averaging five large
 blooms to the spike. Autumn.
 Pollen parent Lc Elissa X Lc
 Valencia was a huge 8" dark
 mauve bloom with intense purple
 lip and yellow throat.
- R-20 C Trianae X C Remy Chollet. 2 1/2" 2.50
 The trianae seed parent was a 3" 4.00
 husky, compact 7" bloom with
 blush colored sepals and petals
 and deep purple lip with bright
 yellow zone in throat. December.
 Remy Chollet, having repeated-
 ly proved its prowess as a stud
 plant, should again demonstrate
 the fine qualities of this pollen
 bloom 8" breadth, dark, well-
 held petals and sepals with vivid
 deep purple, frilled lip, bordered
 in pale lavender, extra heavy texture.

R-29	C Triumph X Lc Jacquinetta. Both parents of excellent dark quality, should produce dark blooms. Winter.	2"	1.50
R-30	C Nutley alba X Lc Tirlemont. Both blooms were large, showy, pure white with lovely ruffled purple and gold lip and throats. Spring.	2"	2.00
R-31	C Belgica var. Robert Doig X Lc Hertha var. American Beauty.	2"	2.50
	Both of these parents were out-	2 1/2"	4.00
	standing , huge show-type blooms.	3"	5.50
	C Belgica var. Robert Doig was a medium dark bloom with immense velvety purple lip. Winter. Hertha, a rich, rose-colored bloom with crimson lip. Winter.		
R-32	Lc Tridon X C Annie Lines.	2"	3.00
	This cross should produce very large, dark blooms of exceedingly high quality.	3"	5.50
R-33	Lc Princess Prudence X Lc Ravenglass.	2"	2.50
	These are two really out- standing parents. They are among the latest and choicest of the very fine, very dark and very large new hybrids.	3"	5.50
R-45	C Enid alba. This is the most popular of all proven whites with colored lip. It can be depended upon to bloom prolifically, grand, big crisp blooms of gleaming white with vividly colored lips.	2 1/2"	4.50
		3"	6.00
R-48	Lc Leda X Lc South Esk var. Sea Ranch.	2"	1.50
	This combination of excellent parents should produce large dark blooms in the spring.		

R-58	Lc Ida S Myers.	2 1/2"	4.00
	A cross of Lc Windemere, A.M.	3"	6.00
	and an extra fine, dark C Enid made this recently registered hybrid. All of the first crossing which have bloomed were heavy textured, large and dark. Season varies.		
T-10	C Syron X C Gregoria.	3"	5.50
	Flowering season early fall.	3 1/2"	7.00
	Both parents had very large blooms. C Gregoria being very dark.		
T-11	C Yuma (C Achine X C Inter- texta)	3"	5.50
		3 1/2"	7.00
	Both parents are known for their fine flowers. Large, dark flowers are expected.		
T-12	C Jevans X C Mrs. Frederick Knollys.	3"	5.50
	Jevan is one of the strongest growers we have ever seen. Flowers freely. This cross should produce fine blooms. December.		

Seedlings should bloom approximately according to the following schedule:

<u>Pot Size</u>	<u>Time Before Blooming</u>
1 3/4"	3 1/2 to 4 years
2 1/2"	2 1/2 to 3 years
3"	2 to 2 1/2 years
3 1/2"	1 1/2 to 2 years
4"	6 months to 1 year
4 1/2" & 5"	Should bloom on the next lead.

BLOOMING SIZE CATTLEYA SPECIES

Cattleya mendelli: 7.50

Flowers variable and very handsome, 6" and 8" across. Sepals and petals light blush, lip frilled, the front lobe varying from deep magenta to crimson. Late spring.

Cattleya mossiae: 6.50

A near Easter flowering species that is very popular. A rose color, crisped petals, center purple, variegated with violet, throat yellow lined with purple crimson.

Cattleya schroederae: 5" pot 7.50

A near Easter or late winter blooming species of very light variable color. The purple lip is very ruffled and the bloom is extremely fragrant.

Cattleya speciosissima: 7.50

Flowers large. Sepals and petals flesh color, the petals broad and well filled in. Lip slightly trumpet-shaped, rich amethyst and white and amethyst in the center. Very variable.

Cattleya trianae: 7.50

December through February is the flowering period of this very popular species. Color rose to white with yellow in throat, often streaked with a deeper color. The lip is purple. Very free flowering.

Cattleya labiata: 7.50

Considered by some the finest of the species. Flowers are large, being about 6" across, rose-lilac color with violet purple on lip and two yellow eyes in throat. Fall blooming.

"WINDOW GARDEN" ORCHIDS

May be grown with ordinary house plants, and as easily.

All are blooming size.

Cypripedium insigne: 5.50

Leaves pale green in color, about 1' long and 3/4" wide. Usually bears one flower to each new growth, 4" to 5" across. The color is apple green with brown-purple spots, and the lip is yellow-green shaded with brown.

Cypripedium insigne var. *Harefield Hall*: 7.50

One of the best of the *insigne* varieties. Flowers are large, dorsal sepal large and round with broad white margin and large bright brown spots. Late Fall is the blooming period.

Cypripedium fairieanum: 6.00

Is one of the most attractive of the species. Leaves are 6" long and 1" broad. Flowers about 3" across, light green in color striated with violet; the lip is a little shorter than the sepals, white at the base, green at apex. Late summer and Winter is the blooming period.

Dendrobium formosum: 5.50

Pseudobulbs are about 18" tall with leathery leaves about 5" long. Flowers are in groups of three or five, and are 3" to 4" across. They are white except for yellow blotch on lip. Fall is the blooming period.

Dendrobium nobile: 5.50

One of the most valuable members of this family. This species has erect, nearly round pseudobulbs, about 2' tall. Flowers are in groups of two or three and are 2 1/2" to 3" across; sepals and petals are white at base with amethyst tips. The lip has a broad blade with a large maroon spot in the center enclosed in cream-white zone; the apex is amethyst purple. Early summer is the blooming period.

Epidendrum prismatocarpum: 5.50
Strikingly handsome sprays of 15-35 flowers
of cream yellow spotted with purple brown.
Blooms in summer.

Epidendrum atropurpureum: 7.50
This remarkable species has unusually
colored flowers that are very fragrant
and long lasting. The sepals and petals
are chocolate brown, edged with delicate
green. The lip is rose colored. There
are many flowers on each spike and they
last about six weeks. One of the easiest
for an amateur to grow.

Odontoglossum grande: 7.50
Pseudobulbs 3" to 4" high, leaves about
8" to 14" tall, dull green thick texture;
scapes 4 to 7 flowered, about 12" high.
Flowers large, 6" to 7" across and very
showy. Sepals bright yellow, heavily
barred with chestnut-brown, lip short,
nearly round, white or pale yellow,
sparsely blotched with red-brown
Flowers in Autumn.

Odontoglossum schlipperianum: 5.50
Large, many flowers of yellow barred with
sepia. Blooms in late summer.

ORCHID SUPPLIES

Osmunda Fibre	1.00 per pound
Red Identification Tags	.25 per dozen
Capson Sprayer	2.95 each

This is the finest sprayer I have ever seen for Orchids. The mist is fine - just right for spraying the foliage. It may be used for insecticides as well. Guaranteed for one year.

BOOKS

ORCHIDS ARE EASY TO GROW, by Logan & Cosper. A very complete book on orchids for beginners and those with some experience. 6.00

A B C OF ORCHID GROWING, by John V. Watkins. Also a good book for beginners. Not as complete as the above, but still gives all the information a beginner needs. 3.00

GARDEN IN YOUR WINDOW, by Jean Hersey. 3.00
This is a general book on house plants, but there are several excellent paragraphs on orchid culture and plans and specifications for building a Wardian case, together with estimated cost of building. Written so an amateur can understand it.
